

Benefits of Lawn Bowling

Lawn bowling is a low-impact sport that promotes mobility, flexibility and coordination. The physical nature of the game improves overall body wellness while being gentle on muscles and joints. Whether played casually with friends or competitively in organized leagues, lawn bowling helps forge lasting friendships. The supportive atmosphere encourages camaraderie, teamwork, and mutual respect. Laughter is commonly heard and good play is always applauded.

Benefits of a Qualicum Beach Lawn Bowling Membership

Qualicum Beach has North America's only Indoor Green alongside its Outdoor Green, making bowling available all year round. The Winter Indoor Session runs from October to March while the Summer Outdoor Session is from May to September. In the winter there are four league sessions that are 5-6 weeks in length. This allows for winter vacationers to plan their league play around their travels. There are drop-in open draws throughout the week, club tournaments and many opportunities to have fun and be competitive. Free coaching is available for new bowlers to learn the game and develop their skills. The Summer Session is busy with lots of District and Club Tournaments, open draws, practice time and special events.

The cost of the membership includes use of the club's bowls, entry into any club league and the availability to bowl with friends or practice anytime when the greens are not in use for league, open draws or tournaments. Tournaments require an entry fee.

For further information or inquiries visit www.qblbc.ca or contact qblbcmembership@gmail.com.
